

**Meeting point for paper experts in Munich:
The PTS Paper Symposium on 11 - 14 September 2012
- Call for Papers -**

Starting on 11 September, PTS will offer you the opportunity to meet a large audience of international specialists to present and discuss your latest findings from the area of papermaking.

Recent technological results about intelligent resource use and efficient process design will be in the foreground of the prestigious event. Besides presenting practical experience, the conference will focus on future issues relevant to the entire value chain.

Programme structure:

- **Intelligent use of resources**
 - Material-saving realisation of product characteristics
 - Increasing the specific performance of raw materials and process aids
 - Utilising interactions between stock and additives
 - Economical use of energy and water
- **Efficient process design**
 - Designing and dimensioning low-loss processes
 - Economical process control
 - Data-based process and quality assessments
- **Focus on paper – the current market situation**
- **Hot issue – taking a close look at a current topic**

Seize the opportunity to present your ideas and knowledge and benefit from the exchange of well-founded experience among international experts!

Please send us an informative abstract of your presentation of recent research results or industrial experience. It should outline the content of your work, in particular new ideas and approaches, their implementation and benefits to the industry.

Papiertechnische Stiftung
Dr.-Ing. Reinhard Sangl
Hess-Strasse 134, 80797 Munich
Germany
reinhard.sangl@ptspaper.de

Abstracts must be received by 12 March to give our programme committee enough time to compile a well-rounded, attractive lecture programme providing basic ideas for the practical work of engineers, chemical and technology experts as well as management executives in the paper sector.

Kind regards

Reinhard Sangl
